ADITYA GAUR

Full-Stack Developer

EDUCATION

Bachelor of Computer Applications, Computer Applications, Expected in 01/2029

University of Mysore - Mysore, India

- Currently pursuing
- Online BCA Program

PROFESSIONAL SUMMARY

Motivated Full-Stack Developer with hands-on experience in building and deploying web applications using JavaScript, React, Node.js, Express.js, MongoDB, and REST APIs. Skilled in authentication, database integration, routing, deployment, Git/GitHub workflows, and debugging. Currently enhancing Data Structures & Algorithms in Java while developing production-ready projects.

EXPERIENCE

- Built full-stack applications independently across frontend, backend, database, authentication, and deployment layers.
- Used Git/GitHub for source control, iterative development, and project documentation.
- Debugged practical issues involving Node.js, MongoDB Atlas, DNS resolution, Vercel/Render deployment, environment variables, and build configuration.
- Applied clean code, separation of concerns, reusable components, secure authentication, error handling, and maintainability principles.

PROJECTS

1. GATI — Full-Stack Ride Booking Application

Technologies: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS

Description: GATI is a full-stack ride-booking web application with separate user and captain authentication flows. It includes protected routes, JWT-based authentication, React Context API for state management, vehicle selection, REST APIs, MongoDB integration, and responsive interfaces.

Live Demo: GATI Live Demo

GitHub: GATI GitHub Repository

2. BiteLoop — Food Discovery Platform

Technologies: React, React Router, Axios, Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs, Multer, ImageKit

Description: BiteLoop is a full-stack MERN food discovery platform where users can discover short-form food reels, like and save dishes, manage profiles, and interact with food partners. Food partners can register, manage their profiles, and upload food reels. The platform includes JWT authentication, MongoDB/Mongoose data management, responsive vertical video feeds, and cloud-based media storage using ImageKit.

SKILLS

Languages: HTML, CSS, JavaScript, Java, TypeScript

Frontend: React.js, Vite, React Router, Context API, Tailwind CSS, Axios

Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt

Database: MongoDB, MongoDB Atlas, Mongoose, PostgreSQL

Cloud & Media Services: Amazon EC2, ImageKit

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Database Fundamentals

Currently Learning: Next.js, PostgreSQL, System Design, Open-Source Contribution
